

Your guide to the right bracelet size

HOW TO MEASURE YOUR WRIST CORRECTLY – STEP-BY-STEP INSTRUCTIONS

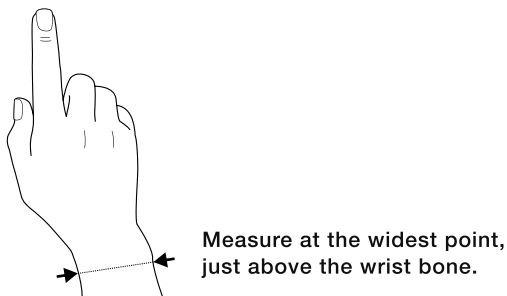

Please print this guide at 100% scale on DIN A4 paper.

Place a bank card on the rectangle below to check print accuracy.
If the size matches, you can use the ruler to determine your correct bracelet size.
Inspired by general industry standards for bracelet measurement tools.

How to measure your wrist using the paper strip

1. Cut out the paper measuring strip.
2. Wrap it around your wrist – ideally at its widest point.

3. See which number the tip of the strip points to – that's your wrist circumference.
4. To ensure a comfortable fit, add 1 centimeter to your wrist circumference.
